Keep Your Lawn Well Groomed The Effortless Way

SAWCO SPECIAL

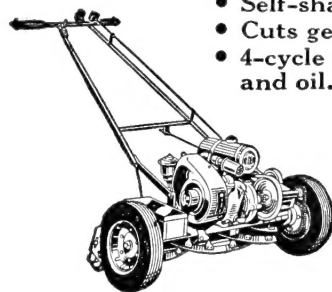

- No gas and oil mixing with 4-cycle engine.
- Cuts smooth clean mat full 20 inches wide.
- Automatic governor for even precision cutting.

\$139.50

Give your lawn that well-groomed look with the SAWCO SPECIAL precision cutting power mower. Four exclusive features make it the mower that owners recommend: (1) Special high precision ball bearings—no need ever to lubricate. (2) Three special lugs prevent tire from slipping on the wheel. (3) Positive wheel drive means chalk-line mowing. (4) Drop-out reel makes servicing simple. Adjustable handle makes mowing easy for the whole family. Cutter blade sharpens itself while you mow. You get extra power for climbing knolls and terraces from the 4-cycle 1 to 1½-h.p. gasoline engine.

IDEAL "VICTOR 24"

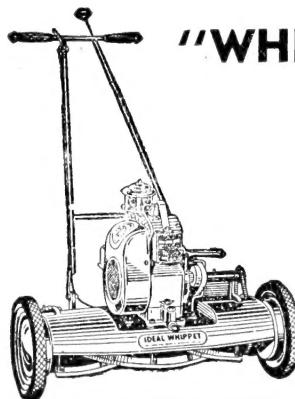

- Designed for smooth handling.
- Self-sharpening cutting reel.
- Cuts generous 24-in. swath.
- 4-cycle engine . . . no need to mix gas and oil.

\$249.50

Newly designed, popular-priced quality power with 24-in. cutting width. Takes the work out of lawn tending for large homes, parks, playgrounds and public buildings. Smooth-running, precision ball bearings on the 24-in. cutters shorten time and trips around broad lawn areas. Independent controls for speed, traction and cutting reel are handy, right up on the sturdy steel handlebars. Tool box mounted on frame. Four-cycle engine.

Also 28-in. cut for larger areas. \$284.50.

"WHIPPET 21" • \$159.95

Sturdy, durable mower for easy lawn tending and the cost is well within the average home-owner's budget. Designed for modest homes, The Whippet 21 is ideal quality throughout. Easy handling and convenient to use. 21-in. cutting reel with 6-in. diam. Its narrow all-over width lets it mow close to trees, shrubs, and flower beds. 4-cycle gasoline engine . . . no fussing with gas and oil mixing. Handle raises for easy storing.

DELICATE TINTS AND EXOTIC HUES IN THIS CYCLE OF BLUES

Mostly exceeding 6 feet, these striking perennials produce magnificent flower-spikes in July and August; cut them down after blooming for a second growth in fall. Many treat as an annual, sowing under glass in midwinter.

Giant Pacific Hybrids

These New Hybrids are so much larger and finer than the best varieties produced hitherto, that they have deeply impressed all who have seen them. All the florets are 2 inches or more across, and they are excellent for show purposes.

GIANT-FLOWERED PANSIES (Treat as Annuals or Biennials)

Sow in April and again in July and August in a light, cool, but well-moistened soil, enriched with General Garden Fertilizer. Cover them three times their diameter, and firm the soil. Seed-bed should not

be allowed to dry out. Transplant to 1 foot apart. Protected in winter under glass, summer-sown plants are put out in bloom in April; carried over in the open they flower a month later.

SUPER-PASTORAL GIANTS. This superb strain of giant fancy Pansies is the culmination of years of scientific culture. A vigorous root-system enables it to bloom well into hotweather. Flowers are round, of immense size, firm texture with strong stems.

BY ALL MEANS—Plant Strawberries

Well-drained soil is a requisite for Strawberries. They will not do well in a stiff clay; sandy loam is ideal, with a plentiful supply of moisture at all times. Select potted plants and space them at 9 to 12-inch intervals in rows 2 feet apart in spring or late summer. The potted plants which we offer have been established from late fall runners. They are fine strong specimens, ready to take hold as soon as they are transplanted to your garden.

The soil where Strawberry plants are to be set out should be carefully prepared ahead of time. Plow or spade it to a depth of 6 to 8 inches. Then with a rake, smooth and level it off to form a bed.

Set the plants out on a cool cloudy day if at all possible. In case of hot sunny weather after they are planted, shade them until the roots take hold. Place them at the same depth at which they were in the pot—with the bud just at the surface of the ground. Keep the row well weeded at all times, but when hoeing remember that the roots are very close to the surface. It is a good plan to spread about ½ inch of peat moss under the plants in December, as winter protection. When spring comes, it can be brushed under the plants to conserve moisture in the soil and to keep the berries clean.

Early

FAIRFAX. One of the very top varieties for family gardens and roadside markets because of its superb flavor and dark red berries. Sturdy, attractive plants with large, dark green leaves. Produces a good crop of blocky, rich red berries that are popular everywhere.

PREMIER. The best early Strawberry. It does well on any soil and even under unfavorable conditions will make a splendid crop. The berries are beautiful in appearance, having uniform shape and a glossy, rich red color that extends through the whole berry. Delicious flavor. We cannot recommend Premier too highly.

Potted Plants, \$2.50 per doz., \$4.50 for 25, \$15 per 100

Strawberries, Big Joe

Midseason

BIG JOE. Extremely large, beautiful berries with large, bright green calyx. One of the best in flavor. Succeeds in almost all soils and under all conditions, and is therefore a valuable sort. A good producer, mid-season to late.

CATSKILL. Does especially well in the northern states. Can be depended on for a big crop of big berries in midseason. Fine quality and flavor; pleasing light red color, making them very showy. Firm enough for shipping short distances. Vigorous, healthy plants.

Potted Plants, \$2.50 per doz., \$4.50 for 25, \$15 per 100

Everbearing

The following types produce flowers rather sparingly all season. By keeping them pinched off in spring and summer until August 15, and so building up reserve strength in the plant, a fair crop of good fruit will be developed for the autumn.

MASTODON. The most popular everbearing sort. Needs plenty of moisture all summer but not especially rich land. The strong, rugged plants can be depended on for a crop under almost any conditions. Large, bright red berries in spring as well as fall.

PROGRESSIVE. Medium-sized berries of full flavor are produced all season.

Potted Plants, \$2.75 per doz., \$4.75 for 25, \$17.50 per 100

TRANS-PLASTIC PAINT—Modern Beauty Long-Lasting Colors

Walls, floors, linoleum, furniture will all be brighter, more attractive and last longer if protected with mar-proof, color-harmonizing Trans-Plastic. Use it inside or out, wherever colorful protection is desired. You'll be amazed at the difference just one coat will make, how it covers and hides in one coat over even old, badly worn surfaces. Mirror-like in smoothness, tough enough for industrial use, yet dainty enough to blend with the delicate

soft colors of the finest homes; provides a new note in modern decoration.

Trans-Plastic does not crack, chip or peel. It comes up gleaming even after frequent scrubbing and hard wear. Its glossy surface resists alcohol, fruit juices, heat, boiling water, and the daily torture of hard wear underfoot.

SPECIAL TULIP BULB OFFER *for Advance Orders*

RECEIVED UP TO AUGUST 1

EXHIBITION COLLECTION: Darwin, Breeder and Cottage Tulips

Without exception no May-blooming bulbous plant rivals the Tulip for its brilliance of color and its adaptability to thrive in the shrubby border, perennial border or formal beds. Creating a lovely garden with Tulips is like painting a picture. And the difference between the hesitant amateur and the finished creator of garden pictures is likely to be the same difference that separates the beginner in painting and the finished artist.

Tulips may be used by the amateur very successfully to obtain color harmonies with many of the most beautiful spring-flowering perennial plants such as the tall bearded Iris, the blue tones of spring Veronicas, Phlox divaricata, Mertensia virginica, blue Aubrieta, and the white Arabis or Iberis, or the orange tone of Siberian Wallflower. Vivid pink Tulips look well against the deep blue lilacs in the shrubby border; the vivid scarlet ones may be planted in clumps of ten to twenty-five against the light and deeper green of evergreen plantings. They make May a delightful beginning to your garden year.

TEN EXHIBITION TULIP VARIETIES

The following ten varieties are considered by Tulip experts to be without a peer in their respective colors for garden planting.

BELLE JAUNE. (Cottage.) For size, depth of color, strength of stem, this is one of the best rich golden yellow Tulips, if not the best. Height 30 inches.

BLUE PERFECTION. (Darwin.) Bright blue-violet, of excellent size, borne on strong stems. The petals have a very artistic appearance, differing from most Darwins in being pointed and slightly reflexed. Blooms with the early Darwins and remains in good condition throughout the Tulip season. Slightly fragrant. Height 30 inches.

GLACIER. (Darwin.) Among the very best of all white Tulips. A flower of largest size when well grown. Has a long season of bloom and is of excellent substance. Height 30 inches.

INDIAN CHIEF. (Breeder.) A huge flower of wonderful substance and most artistic shape, carried on a very long, strong stem, usually 6 inches taller than the best new Giant Breeder varieties. A color unlike any other Tulip, best described as a reddish mahogany edged warm brown. A leader at all Tulip exhibitions. Height 36 inches.

MARJORIE BOWEN. (Cottage.) A very unusual shade—a combination of buff and salmon, which passes to deep rose-pink with salmon shading. The large, well-formed flower is borne on a fine strong stem. Splendid for exhibition; much admired on account of its lively color. Height 29 inches.

MARSHALL HAIG. (Cottage.) Among the new Tulips this ranks as one of the most brilliant scarlets, with a bright yellow base. A flower of magnificent size and texture, much admired on account of its color. We consider this the best brilliant scarlet hybrid Tulip of recent introduction. Height 30 inches.

PRIDE OF ZWANENBURG. (Darwin.) Salmon-pink with a narrow margin of bluish rose. The large flower is carried on a strong, stiff stem. One of the finest pink Tulips, of great substance and especially recommended for exhibition. Height 30 inches.

TANTALUS. (Breeder.) Much praised at all exhibitions on account of its fascinating color. Large, cup-shaped flower of excellent substance, of light cadmium-yellow overlaid with dull slate-violet. Height 30 inches.

THE BISHOP. (Darwin.) One of the outstanding Tulips at most exhibitions and conceded the finest in its class. Best described as the purest heliotrope shade in the Darwins. A large, bowl-like flower of very artistic coloring. Height 30 inches.

THE PEACH. (Darwin.) Without a doubt, this is the finest peach-pink Tulip that has been introduced to date. The color is an even tone of peach-pink. The flowers are large, of splendid substance, and are borne on strong stems; when grown indoors, the color is very beautiful. It blooms with the early Darwins and remains in fine condition with the later ones. Height 30 inches.

Any of the above 10 varieties of Tulips, if ordered separately, 10 bulbs \$1.50, 100 bulbs \$12

SPECIAL COLLECTION OFFER FOR ADVANCE ORDERS

50 Bulbs, 5 each of the above 10 varieties, \$5.50; 100 Bulbs, 10 each of the above 10 varieties, \$9.50

GLADIOLUS *Pre-Cooled Bulbs*

May be planted from now until July 10

Many of our patrons desire Gladiolus bulbs for September blooming. In the neighborhood of New York they should be planted from now until July 10. Order the bulbs immediately; we reserve them and place them in our cold-storage warehouse.

Any good garden soil will grow Gladiolus well, provided they are planted in a sunny location. Bulbs should be 4 inches deep and at least 6 inches apart; frequent cultivation with a hoe or a weeder, around the base of the plant, is advisable. For best results, we recommend plants being staked when a foot high. Water copiously, and as the flower buds begin to form, apply liquid manure for exhibition spikes.

We offer below a selected list of varieties of this popular garden flower. We can supply these bulbs in six separate colors, as well as a mixture of all colors.

COMMANDER KOEHL. Large, brilliant scarlet-blood flowers on a tall stem. Fine exhibition sort and one of the best reds. \$1.00 for 10, \$7.50 per 100.

MAID OF ORLEANS. The pure white florets have cream throats. Many florets in bloom at once. Excellent for exhibition. \$1.00 for 10, \$7.50 per 100.

MINUET. The blooms are of beautiful clear, light lavender, with four to six large, heavily textured blooms open at one time. Late. \$1.00 for 10, \$7.50 per 100.

PELEGRINA. One of the finest dark blue-violet varieties ever introduced, with large individual florets. \$1.00 for 10, \$7.50 per 100.

PICARDY. The individual flowers are delicate apricot-pink, extremely large, somewhat ruffled, and of heavy, wax-like substance. \$1.00 for 10, \$7.50 per 100.

YELLOW EMPEROR. The florets are self-colored, and about the same hue as King Alfred daffodil; handsome spikes. \$1.25 for 10; \$10 per 100.

AMERICAN HYBRIDS MIXED. Contains all the colors available in the flower. The popular price warrants liberal planting. Well matured and good; excellent for cut-flower purposes and mixed borders. 75 cts. for 10, \$6 per 100, \$55 per 1000.

GLADIOLUS THRIPS

A destructive insect of microscopic size causing a silvered appearance on the foliage, drying of the flower-buds, and a general blighting of the plant.

Gladiolus corms obtained from us have been treated to control thrips. On their arrival, however, we recommend:

Before Planting

1. Remove the skins, so that "bare" corms are planted. Do not injure the tips.
2. Stir 2½ ounces of Semesan in one gallon of water. Immerse the corms in the liquid for seven hours; dry and plant.

During Growth

3. Spray with Gladiolus Thrip Spray. Dissolve one pound in 10 gallons of water and apply every two weeks.

When Bulbs Are Lifted

4. In autumn, burn the tops cut from the lifted corms. Place corms in a low, but not freezing, temperature for six weeks.
5. Next cover with paper, first dusting through them one pound of Thripco to each 1000 corms; or you may use Naphthalene Flakes. Avoid containers with close-fitting lids; ventilation is necessary.
6. At the end of one month, shake out the Thripco or Naphthalene Flakes, and store the treated corms in the usual way.
